

# SIMPLE STEPS BETTER AIR

## TAKING RTD IS A GREAT START TOWARDS BETTER AIR IN COLORADO

Public transit is a powerhouse when it comes to easing congestion and improving air quality. Twice a week, hop on the bus or Light Rail for your commute, or head downtown for some fun.

## SKIPPING AND/OR COMBINING YOUR CAR TRIPS

Combining or cutting two car trips a week helps keep our air clean. Walk to lunch, shop online, and ride your bike to do errands.

## COMBINING PASSENGERS ON TRIPS

Making new friends isn't the only advantage to carpooling/vanpooling. There's the gas savings, no hunting for a parking space, access to Colorado's HOV lanes, not to mention cleaner air.

## IN THE CAR AND ON THE ROAD

Better Colorado air is as simple as refueling in the evening and stopping at the first click. When you do drive, aim to keep each stop to 30 minutes or less.
